

Information about Natural Gas:

- ❖ Each day, underground pipelines carry natural gas safely and efficiently to millions of homes and businesses across the USA.
- ❖ In our community, underground pipelines provide natural gas service to homes, businesses, schools, and industries.
- ❖ According to the National Transportation Safety Board, pipelines provide the highest level of public safety as compared to other modes of transportation.
- ❖ The natural gas industry is extensively regulated by Federal and State regulations with regard to design construction, operation and maintenance.
- ❖ Since Natural Gas pipelines are buried underground, "markers" are used to indicate the underground pipeline's approximate location.
- ❖ Information on the markers includes the telephone number for reporting pipeline emergencies.
- ❖ Markers indicate the general location of the pipeline and should not be relied upon to indicate the exact location of the pipeline, the depth or the number of pipelines in the vicinity.
- ❖ It is a crime for any person to willfully deface, damage, remove, or destroy any pipeline marker required by federal law.
- ❖ Safety is the number one priority of the USA's natural gas industry.
- ❖ If you ever smell gas call us at **256-974-9023** or if a natural gas pipeline emergency occurs call **911**.
